

Microsoft Word Exercises - Week 4

You will find two cards in this section

- One called Exercise 4 - Chemical equations
- One called Exercise 5 - Equation Editor.

Each of these, when clicked will download a zip file containing a pdf file.

In both cases, unzip these files.

You are asked to reproduce these files by creating a word document and using the Equation Editor in MS Word.

You are asked to put these two (.docx) files in a folder, zip the folder and upload the zip file to Moodle during class.
